Self-Determination Among Older Adults With Chronic Conditions: Challenges and Opportunities for Social Workers and Social Work Education

**Nicole Ruggiano, PhD, MSW
School of Social Work**

**Robert Stempel College of Public Health & Social Work
Florida International University**

October 24, 2014

**CSWE
Gero-Ed Center**

Context of Chronic Conditions in Later Life

- People are living longer but are likely to be living with chronic illnesses and disabilities later in life.
- Many older adults have co-occurring conditions.
- Chronic care often involves increased use of health and support services.

Self-Determination

- A concept reflecting the belief that all individuals have the right to direct their own lives.
- A philosophy within larger service systems that promotes service recipients as being active in the planning and management of their services.¹
- Can be facilitated by family members and providers by encouraging older adults to be active participants in the planning and decision-making for their daily and chronic care needs.²

■ Threats to Older Adults' Self-Determination

- *Sources of Ethical Dilemmas for Social Workers*

Societal Beliefs and Myths

- Myth: Older adults are not able to make decisions about their lives and health/supportive needs.
- *Fact: Even older adults with cognitive decline can make consistent choices about their preferences.*³
- Myth: Older adults find decision-making to be overly burdensome.
- *Fact: Older adults want control over at least part of their lives and services, if not all.*⁴
- Myth: Older adults make poor decisions about their lives/services.
- *Fact: Older adults may evaluate different information or values when making decisions.*⁵

Family Members and Caregivers May:

- Misperceive and disagree with older adults' care values.⁶⁻⁷
- Assess care recipients as being more disabled than the older adult's self-perception of disability might be.⁸
- Be gatekeepers to information regarding available services to older adults.⁹
- Have emotional or financial interests that manifest as over-protectiveness toward a loved one or as different goals and objectives for care provision.¹⁰

Health and Support Providers

- Age-based stereotypes are often used when formulating long-term care policies and goals.¹¹⁻¹²
- Providers may view self-determination as offering a set of prescriptive choices based on professional opinion.¹³
- Providers may trivialize and be dismissive about older adults' complaints due to ageism.¹⁴⁻¹⁵

■ Opportunities for Social Work Education

- *Infusing Themes of Self-Determination Into Practice Courses and Field Practicum*

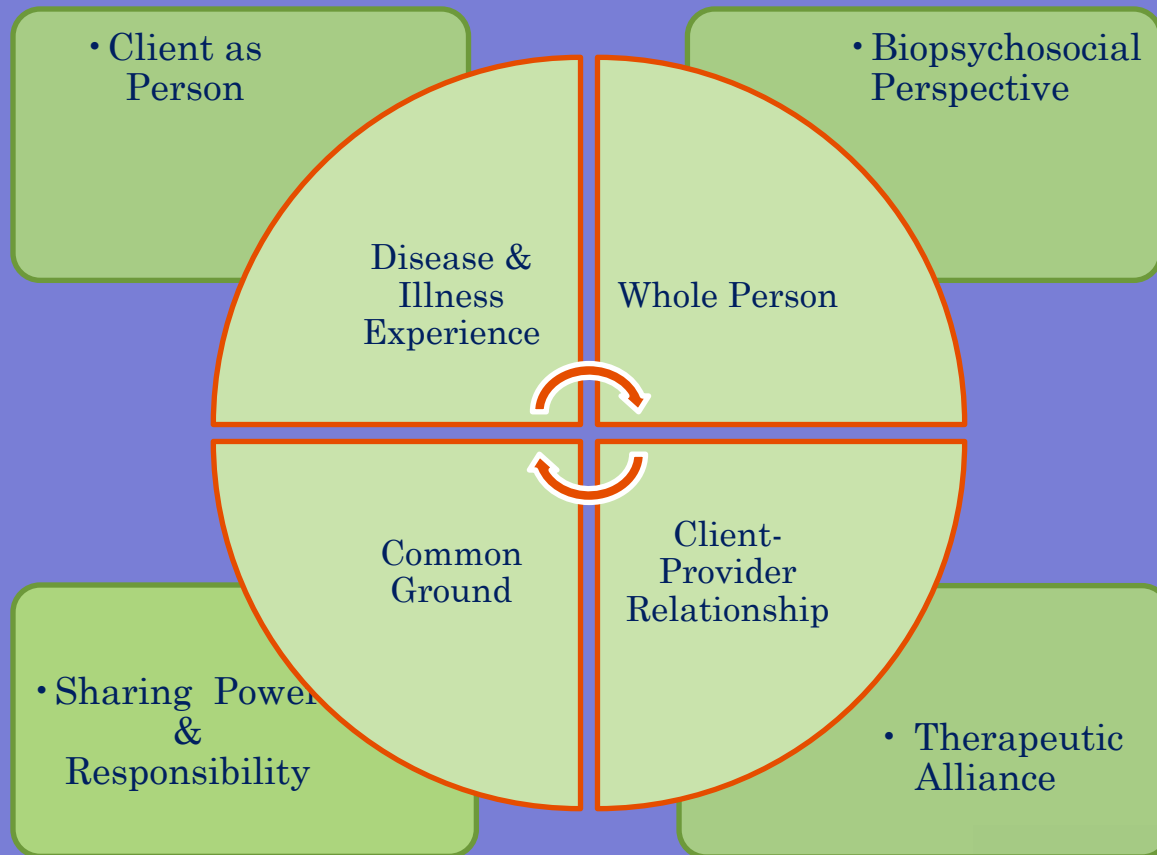

Moving Away from the Medical Model

- Expanding social workers' understanding of how to approach self-determination.
- Emphasis on older adults as expert collaborators.
- Recognizing cognitive capacity as being on a continuum.
- Valuing people and experience over illnesses and disabilities.

Toward a Person-Centered Model

Practice Within the Family Context

- Helping older adults navigate family decision-making.
- Creating opportunities where the older adult's voice can be heard and incorporated into decision making.
- Education and creative problem solving to meet older adults' and caregivers' self-interests.

■ Opportunities for Social Work Education

*Infusing Themes of Self-Determination Into
Macro/Policy Courses*

What is an Aging-Friendly Community (AFC)?

- City, town, or neighborhood where older adults are actively involved, valued, and supported in a way that reflects their unique needs and priorities.

Developmental Needs and Priorities

- Continuity
- Compensation
- Control
- Connection
- Contribution
- Challenge

Social Infrastructure

Social Cohesion/Social Capital

Community Engagement

Social Support

Safety

Physical Infrastructure

Affordable and Accessible Housing

Walkable Neighborhoods

Transportation Options

Proximity to Stores,
Services, and Amenities

Why Are Communities Becoming More Aging-Friendly?

- Aging of the Baby Boomers
- Decline in family and social support systems
- Inadequate long-term care policies and services
- Decrease in relocation and increase in aging in place
- Mismatch between older adults and community infrastructure

Aging-Friendly Community Approach

- Top-down
- Community-wide needs assessment and strategic planning
- Requires involvement of a variety of stakeholders including local government
- More emphasis on physical infrastructure
- Funded through a combination of foundation, local government, and state government sources

WHO's Global Age-Friendly Cities and Communities Project

WHO global network of age-friendly cities and communities. (2014). Retrieved from http://www.who.int/ageing/age_friendly_cities_network/en/

Age-Friendly Portland

- Partnership between city of Portland and the Institute on Aging at Portland State University
 - Older adults as key information sources and critical stakeholders to set priorities, propose solutions, and monitor progress
- 2013 Action Plan
 - Age-Friendly Business Certification Program
 - Accessible housing measures included in city's Comprehensive and Consolidated Plan
 - Education on transportation options
 - Directory of age-friendly activities

Neal, M. B., DeLaTorre, A. K., & Carder, P. C. (2014). Age-friendly Portland: A university-city-community partnership. *Journal of Aging & Social Policy*, 26, (1-2), 88-101.

Challenges

- Fuzzy conceptualization and definitions
- Lack of methodologically rigorous evaluations
- Concerns about allocating financial and human resources in a time of fiscal constraint
- Concerns about equity and the potential to exacerbate disparities
- Ensuring the meaningful participation of older adults

Opportunities for Social Work Practice and Research

- Call attention to the needs and contributions of the most economically, socially, and/or physically vulnerable elders
 - E.g., “stuck in place” vs. “aging in place”
- Encourage the participation of all stakeholders
- Interdisciplinary and interprofessional collaboration

MSW Curriculum

- Examples of incorporating/infusing AFC content in:
 - Foundation courses
 - Macro practice courses
 - Aging specialization courses
- Interdisciplinary and interprofessional education
- Increasing content on the importance of the physical environment for older adults and other marginalized populations

ADVANTAGE
Initiative

NORCS
An Aging in Place Initiative

Community Aging Initiatives

- Deliberate and distinct efforts across stakeholders from multiple sectors within a defined and typically local geographic area to make social and physical environments more conducive to older adults' health, well-being, and ability to age in place/community.

Greenfield, E. A., Oberlink, M., Scharlach, A. E., Neal, M. B., & Stafford, P. B. (2014). Community aging initiatives: Conceptual issues and key questions for an emerging paradigm. Manuscript under review.

Three Primary “Flavors”

- Community planning approaches
- **Support-focused approaches**
- Cross-sector partnership approaches

Key Questions

- What are they?
- Where are they?
- What is their relevance for social work education?
- How to learn more?

What Are They?

Greenfield, E.A., Scharlach, A., Lehning, A., & Davitt, J. (2012). A conceptual framework for examining the promise of the NORC Program and Village models to promote aging in place. *Journal of Aging Studies*, 26(3), 273–284.

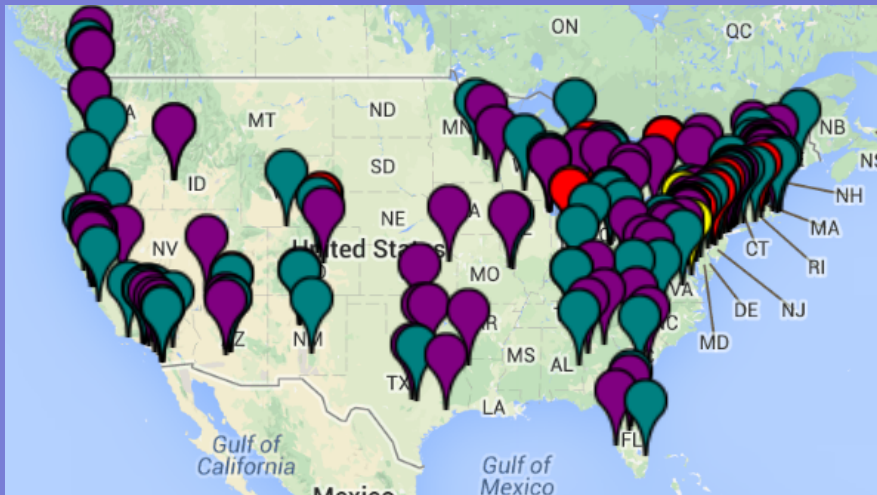

Key Differences

- Type of organization
- Personnel
- Benefits
- Participants

Greenfield, E.A., Scharlach, A., Lehning, A., Davitt, J., & Graham, C. (2013). A tale of two community initiatives for promoting aging in place: Similarities and differences in the national implementation of NORC programs and Villages. *The Gerontologist*, 53, 928–938.

Where Are They?

A Good Place
to Grow Old:
New York's Model
for NORC Supportive
Service Programs

Curricular Updates

- Advanced curriculum
 - Community practice
 - Aging services
 - Direct practice with older adults

Opportunities for Innovation in Foundation Content

- Practice: Program processes and core social work values
- Research: Complexities around evaluation
- Diversity and Oppression: Which communities benefit?
- Human Behavior: Program outcomes and adult development
- Policy: Role of government at local, state, and federal levels
